Major General David G. Bassett and Randall G. Walden to Keynote Tri-Service Open Architecture Interoperability Demonstration in January 2020

Representative Commands from Branches of the U.S. Armed Services Bringing Distinguished Speakers to New Event about Growing Open Market Ecosystem

Atlanta, GA – October 1, 2019 – The [Tri-Service Open Architecture Interoperability Demonstration](http://www.tsoa-id.com) (TSOA-ID, www.tsoa-id.com) – a live, technical demonstration for media and the acquisition community on the future of defense acquisition to be held on January 29, 2020 at the GTRI Conference Center in Atlanta - announces Major General David G. Bassett, U.S. Army Program Executive Officer for Command, Control, Communications-Tactical (PEO C3T), will Keynote the event. MG Bassett guides a workforce of more than 1,600 personnel who acquire, field and support the communications networks, radios, satellite systems and other hardware and software Soldiers require for information dominance on the battlefield.

In addition, TSOA-ID is honored to welcome Mr. Randall G. Walden as Keynote speaker as well. Mr. Walden is a member of the Senior Executive Service and Director and Program Executive Officer for the Air Force Rapid Capabilities Office, Office of the Administrative Assistant to the Secretary of the Air Force, Washington, D.C. He directs selected study, development and fielding activities tasked directly by the Under Secretary of Defense for Acquisition, Technology and Logistics, the Secretary of the Air Force, the Chief of Staff of the Air Force and the Assistant Secretary for the Air Force for Acquisition.

About the Event

The Tri-Service Open Architecture Interoperability Demonstration is a unique, one-day event bringing leading technical experts and decision-makers together. Keynotes, interactive demonstrations and a product showcase from [industry partners](#) will provide attendees a first-hand experience to witness new achievements and maturity in the growing open market ecosystem.

Live demonstrations will be on Systems Acquisition and Integration, Module Specification and Development, Conformance (qualification) and culminate with Open Systems Realization.

With FACE™, as well as standards defined through HOST, SOSA™, CMOSS and more, several Army, Navy and Air Force representatives will reveal the ease of interoperability (exchange of hardware and software modules). Demonstrations will show how that allows for faster incorporation of innovation, delivery of new capabilities (or replacement technology) and alleviates being forced into changing all components in an entire system.
